

Attendance Management System (Django) - Source Code

models.py

```
from django.db import models

class Student(models.Model):
    name = models.CharField(max_length=100)

    def __str__(self):
        return self.name

class Attendance(models.Model):
    student = models.ForeignKey(Student, on_delete=models.CASCADE)
    date = models.DateField(auto_now_add=True)
    status = models.BooleanField(default=False)

    def __str__(self):
        return f"{self.student.name} - {self.date}"
```

views.py

```
from django.shortcuts import render, redirect
from .models import Student, Attendance

def home(request):
    students = Student.objects.all()
    return render(request, 'home.html', {'students': students})

def add_student(request):
    if request.method == 'POST':
        name = request.POST.get('name')
        Student.objects.create(name=name)
        return redirect('home')
    return render(request, 'add_student.html')

def mark_attendance(request, student_id):
    student = Student.objects.get(id=student_id)
    Attendance.objects.create(student=student, status=True)
    return redirect('home')

def attendance_list(request):
    records = Attendance.objects.all()
    return render(request, 'attendance_list.html', {'records': records})
```

urls.py

```
from django.urls import path
from . import views

urlpatterns = [
    path('', views.home, name='home'),
    path('add-student/', views.add_student, name='add_student'),
    path('mark-attendance/<int:student_id>/', views.mark_attendance, name='mark_attendance'),
    path('attendance-list/', views.attendance_list, name='attendance_list'),
]
```
